Administration Charge	\$	\$0.25	\$	\$0.25	\$	\$0.25

# Electricity Bill Seasonal Tips

As temperatures rise and electricity use increases, a few simple steps can help manage your consumption and avoid higher bills.

## Adjust your cooling settings

Set your thermostat a few degrees higher and use fans to stay comfortable. Clean or replace air conditioner filters regularly to keep systems running efficiently.

## Block heat from entering your home

Keep blinds or curtains closed during peak sun hours to reduce indoor heat.

## Seal in cool air

Seal any gaps or leaks to prevent cool air from escaping and warm air from entering.

## Limit use during peak heat hours

Avoid running major appliances like laundry machines, dishwashers, and ovens during the hottest part of the day.

## Use appliances efficiently

Switch to cold water for laundry and air dry when possible. Choose smaller appliances like microwaves instead of ovens to reduce heat and energy use.
